Intimate care policy  
Safeguarding

## **Rational**

There are times when children need nappy changes, help with toileting and changing clothes at Nursery. This policy provides clear guidelines for providing the intimate care of children. These guidelines are designed to promote good practice and safeguard children and practitioners.

## **Aims**

To include all children in activities regardless of their ability to manage their own personal care

To safeguard the rights and promote the welfare of children

To provide guidance for staff

To reassure parents

## **Definition of intimate care**

“Care tasks of an intimate nature, associated with bodily functions, bodily products and personal hygiene, which demands direct or indirect contact with or exposure of sexual parts of the body”

These tasks include: dressing and undressing, helping to use the toilet, cleaning, wiping intimate parts of the body, apply medical cream or nappy cream

## **Definition of personal care**

“Although it may not involve touching another person, it is less intimate and usually has the function of helping with personal presentation”

Tasks include: Feeding, medication, hair, dressing, washing and prompting and supervising going to the toilet
